

SAFE-T-RIDE

School bus specific seating designed with child comfort and safety in mind

SAFE-T-RIDE seating by Coachworks has been specifically designed to improve passenger comfort in the school bus and day charter markets. Through minimising the seat dimensionally we believe that many operator, driver and passenger issues have been addressed.

The SAFE-T-RIDE seat is also a suitable option for the smaller vehicle market, with the low squab height ensuring all passengers enjoy improved forward vision and the elimination of that closed in or claustrophobic feeling.

FEATURES OF SAFE-T-RIDE

- Easy installation in new and used vehicles with multi position wall mount and leg positions
- Minimal squab height to improve driver surveillance and forward vision for passengers
- Improved leg comfort through minimal cushion length and height from floor
- Slimline squab design to maximise seating capacities
- Child friendly sash guide positioning
- Externally mounted seat belt reels for ease of maintenance
- Quick release seat cushions to allow access for cleaning
- Manufactured using the latest technology
- Trimmed in quality heavy duty fabric
